

Community Health Center Funding

Community Health Centers Operational Funding, FY 2010 – FY 2020
(in Billions)

Over 70% of federal funding for the Health Center program comes from the **Community Health Center Fund (CHCF)**, which was created in 2010. Currently, the CHCF totals \$4 billion and is set to expire unless Congress secures long-term funding. Health centers also receive funding from the annual discretionary appropriations process, which totaled \$1.63 billion in FY19. Together, these two resources, also known as Section 330 funding, are invested in **new health center sites, expanded capacity** at existing health centers, and **additional services** like **behavioral health, substance abuse and oral health**.
